

for Virtual Training and Learning using vLMS in the Government Sector

PeopleLink solves the problem of bridging the gap between educators/trainers and learners. The technologies applied transform the authentic brick and mortar training room into a global learning platform. Students can learn directly from the experts on various subjects, ask questions and collaborate with peers without shifting base.

The Issue

The need to have a learning management system (LMS).

The need to ensure that the content delivered to staff across and within government offices is standardized.

The PeopleLink Solution

PeopleLink Acumen: Manage Teaching

- Create courses.
- Offer learners video lessons.
- Offer course subscriptions.
- Manage content delivery, assessments, analytics of syllabus completion.
- Ensure that lesson plans are followed as per schedule and the syllabus is completed on time.

PeopleLink Acumen: Standardize teaching delivery

- Central content repository.
- Control pedagogy.

What are Your Needs:

The ability to facilitate long-distance training of government staff?

Enable efficient knowledge transfer?
