PeopleLink

PeopleLink
Solution Brief

for CMS & Lecture Capture in the Education Sector

Another challenge is to record class lectures for live or later distribution and remote viewing. This necessitates having in place hardware and software that can reliably and cleanly capture such information and stream it.

The Issue

The need to have a centralized depository of content that has already been generated in class or future knowledge sharing and transfer.

The need to have a learning management system.

The PeopleLink Solution

PeopleLink Hardware:
- High End Digital Classroom & Virtual Classroom Setup.
- Lock & Track Camera focusing on Teacher; PTZ on Students.
- One Visualizer on Podium for showing Live Book Content.
- PeopleLink's Lecture Capture Solution Supports multiple Cameras enabling lecture recording. Inbuilt Digital WhiteBoard, and sharing of presentation, desktop, and media.

PeopleLink Acumen: Standardize teaching delivery
- Central content repository.
- Control pedagogy.

PeopleLink Acumen: Manage Teaching
- Create courses.
- Offer learners video lessons & course subscriptions.
- Manage content delivery, assessments, & more.
- Ensure lesson plans are followed & syllabus is completed timely.

What are Your Needs:

The ability to capture classroom lectures for archiving and later distribution?

Give teachers and learners the tools to readily and remotely access content?

Enable efficient knowledge transfer?
